Please read this manual very carefully before wearing your helmet and keep it in a safe place. For a correct use and for your safety, please pay attention to following instructions. The main function of the helmet is to protect your head in case of impact. This helmet is made to absorb some of the energy of a blow by partial destruction of its component parts and, even though damage may not be apparent, any helmet which has suffered an impact in an accident or received a similarly severe blow or other abuse should be replaced. To maintain the full efficiency of this helmet, there must be no alteration to the structure of the helmet or its component parts, without the approval of the Type Approval Authority, that may decrease safety for the user. Only homologated accessories will maintain the helmet safety. No component or device may be fitted to or incorporated in the protective helmet unless it is designed in such a way that it will not cause injury and that, when it is fitted to or incorporated in the protective helmet, the helmet still complies with the requirements of the homologation. No accessory shall be mounted on the helmet if some of the symbols, other than location fitting symbols, marked in the accessory homologation is not marked in the helmet homologation label.

In order to maintain trouble free operation of the visor, it is advisable to periodically lubricate the mechanisms and rubber parts around the visor with silicone oil. The application may be made with a brush or with the help of a cotton swab. Apply sparingly and remove the excess with a dry clean cloth. This proper care will maintain the softness of the rubber seal and will dramatically increase the durability of the visor fixing mechanism.

为了保持遮阳板的正常使用，建议定期用硅油润滑遮阳板周围的机件和橡胶部件。可使用刷子或棉签进行涂抹。

少量涂抹，并用洁净的干布去除多余部分。这种适当的护理将保持橡胶密封的柔软性，并将显著提高遮阳板固定机件的耐久性。
