To maintain the full efficiency of this helmet, there must be no alteration to the structure of the helmet or it´s component parts, without the approval of the Type Approval Authority, that may decrease safety for the user. Only homologated accessories will maintain the helmet safety.
No component or device may be fitted to or incorporated in the protective helmet unless it is designed in such a way that it will not cause injury and that, when it is fitted to or incorporated in the protective helmet, the helmet still complies with the requirements of the homologation.
No accessory shall be mounted on the helmet if some of the symbols, other than location fitting symbols, marked in the accessory homologation is not marked in the helmet homologation label.
